

PRE-SEPARATOR TO INCREASE THE EFFECTIVENESS AND LIFE SPAN OF YOUR DUST COLLECTOR

The PS3 captures more than 95% of dust before it reaches the dust extractor, improving your filter's performance. The continuous-bag disposal system is safer and less messy than traditional bin systems.

- Provides additional separation to the dust extraction process, and can capture up to 95% of the dust before it reaches the primary dust extractor
- Significantly improves filter performance and reduces frequency of filter maintenance on your dust extractor
- Contributes to a higher airflow and an extended life span of your extractor's filters and motor(s)
- Robust construction, dependable operation and virtually zero-cost maintenance requirements
- Equipped with a continuous bag disposal system for safe and effective disposal of concrete dust

TECHNICAL SPECS

Inlet Diameter	2.5" (63mm)
Length	21" (53cm)
Width	22" (56cm)
Height	53" (135cm)
Weight	77 lbs (35kg)
