

## SINGLE OR DOUBLE BLAST WIDTHS – YOU DECIDE!

The MODUL300 continues the tradition of offering the most versatile and effective surface preparation system in its class. The blast width of the basic MODUL300 can be doubled by the addition of an Extension Unit, thereby increasing the production capabilities of the standard unit, while still only requiring one operator.

The MODUL300 is uniquely designed with increased production capabilities housed in a mid-sized blaster, while utilizing the Tornado dust collector

### FEATURES

- Compact dimensions
- Very maneuverable
- MODUL200/2<sup>®</sup> can be transported in a small van or trailer
- Exclusive "Travel Mode" prevents damage to dust skirt during transportation, loading, and unloading
- Easy transport to the site
- Long service life on consumables
