

MAKES CLEAN CUTS INTO NEWLY POURED CONCRETE

This is the fastest saw on the market! It excels at making clean cuts into newly poured "green" concrete or general slab cutting. The combination of a center mounted blade and dual roller guides gives the operator the tools to make straight cuts everytime. Unique 6000rpm blade shaft speed allows the blade to slice through green concrete cleanly, without disturbing the aggregate.

TECHNICAL SPECS

Type	Gas	
Engine	Kohler	
Power Output	7hp (5.2kW)	
Cutting Depth	3.25" (83mm)	
Blade Size	10" (254mm)	
Standard Arbor Size	0.625" (16mm)	
Depth Adjustment	Handle Rotation	
Length	44" (112cm)	
Width	15" (38cm)	
Height	31" (79cm)	
Weight	108 lbs (49kg)	
Blade Speed	6000rpm	
Max Depth	Green	1.5" (37mm)
	Cured	3.25" (81mm)
Max Blade Size	10" (250mm)	
Min Blade Size	7" (180mm)	

FEATURES

- High speed and lightweight
- Great for relief joint sawing in new concrete.
- Powered by a 7hp Kohler engine
- Quad clean air filter
