BPR1080 VIBRATORY PAVER ROLLER

TECHNICAL SPECS		
MODEL	BPR1080H-4	BPR1080H-5
Number of Rollers	FOUR	FIVE
Weight	243 lbs (110 kg)	258 lbs (117 kg)
Engine	Honda GX160	
Dimensions	21.5" x 26" x 48"	
Vibration Freq	93Hz / 5600 RPM	
Compaction Force	2381 lbf / 10.5 kN / 1080 kgf	

INSTALL LARGE SLABS & PAVERS WITHOUT CRACKS, CHIPS, AND BREAKS

Designed to work with all pavers and slabs to effectively work your polymeric sand into the joints – right down to the bedding layer!

Our Paver Roller glides gently over a wide range of stone/concrete textures and thicknesses to provide effective joint consolidation without cracking or chipping, which can happen when using traditional compactors.

Reconfigure between 4 or 5 rollers depending on job conditions. Spreading the weight of the machine over more contact points will even further protect the most fragile materials. Revert back to 4-rollers to increase pressure on more rugged stones.

- Roller locks prevent movement during transport
- Throttle on the handle for convenience & safety
- Durable plate steel body
- · Convenient lifting handles double as tie downs
- Built-in hoist hook
