

TWO-STAGE HEPA FILTER SYSTEM WITH JET-PULSE FILTER CLEANING

- The HD1 is a one-motor HEPA dust extractor, that features a two-stage filtering system comprised of a main conical filter and one HEPA filter
- "Reverse-air" jet-pulse filter cleaning system effectively cleans and removes dust build-up on the filters
- Easy-to-use inlet closure door eliminates the need to remove hoses when pulsing and cleaning filters
- Easily connects to hand-operated power tools to extract concrete dust while cutting and grinding
- Equipped with a continuous-bag disposal system for effective dust collecting

INCLUDES FLOOR WAND & HOSE
