

# LANDING GEAR

TRAVEL DOLLY FOR EASY TRANSPORT  
OF WALK-BEHIND TROWELS

## MOVE TROWELS QUICKLY, EASILY, AND SAFELY

No need  
to remove the  
landing gear  
during operation!  
Simply raise them to  
upright position.

### KEY FEATURES

#### Single Operator Design

The dolly attaches to your machine and is easily operated by a single operator. No need for two or three-person crew just to move one machine.

#### Effortless Mobility

Ergonomic design ensures smooth and easy transportation across various surfaces, reducing strain on your workforce.

#### Versatile Compatibility

Compatible with a wide range of models, our system seamlessly integrates with your existing equipment, boosting efficiency without requiring a complete overhaul.

#### Durable Construction

Built to withstand the rigors of construction environments, our Travel Dolly System is crafted from high-quality materials, ensuring long-lasting durability and reliability.

#### Compact and Portable

Designed with portability in mind, our system is compact and easy to transport.

#### Enhanced Safety

Reduce the risk of workplace injuries by reducing manual lifting and awkward maneuvers, keeping your crew safer and more productive.

✓ **Easy to install**

✓ **Fits any brand of trowel**

### WHY CHOOSE OUR DOLLY SYSTEM?

**Increase productivity** by reducing downtime spent on trowel transportation.

**Minimize injuries and fatigue** on your workforce, promoting a safer and more efficient work environment.

**Enhance your business' reputation** for innovation and efficiency in the construction industry.

**PART NUMBER: 20278**
