FEATURES & BENEFITS

PERFECT PROFILES & HIGHER PRODUCTION RATES

Shotblasting is an extremely effective tool for removing old coatings & prepping the floor for new coatings. Benefits include high production rates, very clean profiles, dust free operation, the ability to get into the “hills & valleys” unlike other equipment, plus the benefit of low consumables cost compared to other methods.

SPE12ES

COMMON DESIGN FEATURES:

- Ideal for cleaning/texturing horizontal or slightly inclined surfaces
- Fully adjustable handle and support wheels
- Grill fitted to prevent foreign objects from entering the blast-wheel and potentially causing damage
- Smaller units (9) are ideal for smaller contractors, and the rental industry
- Larger units (16, 12, 20) are designed for the professional contractor
- Compact design
- Travels both forward and reverse, making it easier and faster to move around your work space
- Self-propelled, variable speed drive for comfort and control (except 9g)
- Walk-behind style is more convenient and accurate
- Drive wheels are within the width of the blast cabinet so they don't catch surrounding objects
- Blast wheel can be rotated in both directions (16, 20)
- Abrasive material and debris are contained
- Optional seal system to reduce blasting width for precise blasting, line removal and weld inspection
- Electrical safety certification available for petrochemical refinery use (12, 16, 20)

SPE 9G

- Manually driven for better handling in confined spaces
- “Dead-man” handle starts/stops motor and opens/closes shot valve

SPE 9ES

- Our most popular model

SPE 16ES

- Ideal for blasting steel to SA 2.5-3 standards

SPE 20ES

- Can be dismantled to pass through the 24” access holes in storage tanks
